Allowable Subject Matter

1. Claims 13-24 are allowed.

Reasons for Allowance

2. Claims 13-24 are considered allowable over the cited art because the claimed invention includes the features of: either the steps of or the means for presenting point information related to points added with a commodity code particular to a commodity sold by the vending machine, transmitting the point information and user identification to a center unit, processing of the points corresponding to the particular commodity and totaling and managing the points processed as a current, updated balance. These features are found in each of the independent claims 13 and 19. The closest piece of cited/applied art is Eggleston (US6061660) which is representative of an electronic-based loyalty system that reports loyalty point earnings and manages accruals/redemptions so as to manage a current user balance. However the reference fail to teach or suggest the use of such a system with a vending machine that presents point information in association with a commodity (item) code for use in accruing points as claimed.
